

Answer the following questions:

I. Write a paragraph of not less than 15 sentences on the following two topics (20 marks):

1. The importance of the nursing career
2. A Famous nursing character

II. Translate the following into Arabic (20 marks):

1. In various parts of the world, the educational background for nurses varies widely. In some parts of Eastern Europe, nurses are high school graduates with twelve to eighteen months of training. In contrast, Chile requires any registered nurse to have at least a bachelor's degree. Nurses are the largest group of providers in the health care system--there are over two million registered nurses in the United States of America (U.S.) alone, comprising about 13% of the fifteen million workers in the health care and social assistance category tracked by the U.S. Department of Labor.
2. Nursing is one of the most female-dominated occupations, but the number of males entering the profession is increasing. For example, in 2000 only 5.4% of registered nurses in the U.S. were male; however, that percentage represents a 226% increase over the previous two decades. In 2007, internationally, 10.7% of registered nurses and 10.4% of licensed practical nurses were male. Although the rise in the number of males entering and working in the nursing profession is an ongoing trend, females continue to predominate in nursing, as well as in the health care sector as a whole.

III. Do as shown between brackets (10 marks):

1. I am interested in reading. (Use: interest)
