وصف المقررات لبرامج الدراسات العليا (دبلوم -ماجستير- دكتوراه)

Courses description (Diploma)

- قسم التمريض الباطنى و الجراحى

دبلوم الدراسات العليا المهني فى تمريض الاورام

المقررات اللازمه	اسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
---	تمريض مرضى الأورام (١) Oncology nursing (1)	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	MSNO 611
This course provides the diploma nursing students with general holistic knowledge necessary for care of oncology patients in different management phases including rehabilitation phase.			
---	تمريض مرضى الأورام عملي (١) Oncology nursing Clinical (1)	٣ ساعات معتمدة (٠) نظري + (٣) عملي معتمد	MSNO 612
This course provides the diploma nursing students with general the professional skills necessary for care of oncology patients in different management phases including rehabilitation phase.			
---	التقييم الصحى Health assessment	٢ ساعات معتمدة (١) نظري + (١) عملي معتمد	MSNO 613
This course introduces diploma- nursing students to assess concepts and skills to determine health status of the adult client in the general medical-surgical and specialty setting. Emphasis is placed on collection and interpretation of patient's health practices, clinical data review from history taking and physical examination as well as diagnostic studies and lab findings. Areas to be covered include standard techniques of interviewing and physical examination and documentation. Application and integration of theoretical and clinical aspects will be considered. It focuses on wellness and parameters of Normal health. The parameters of normal health are incorporated into the process of obtaining health history (all types of data collection and documentation) and performing a physical examination.			
---	المناعة (Immunology)	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	MSNO 614
This course focuses on foundation of the immunology, immunity and immunopathological concepts. In addition to understanding the relationship between the immune system and body core systems alterations in the oncology patients.			
---	طب الأورام Medical Oncology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNO 615
This course is designed to provide a course of study on medical health problems and emphasizes theory and practical application of various medical problems management related to human body system functions and health condition impairment as a result of developing different types of tumors.			

---	علم الأدوية لمرضى الأورام Pharmacology for Oncology patients	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	MSNO 616
This course focuses on the examining of major and common categories of pharmacologic agents that used for oncology patients and its application in clinical nursing practice. In addition to understanding the physiological actions of these drugs, expected patient responses, major side effects, and nursing implications for each one.			
MSNT٦١١ MSNT٦١٢	تمريض مرضى جراحة الأورام (٢) Oncology nursing 2	٣ ساعة معتمدة (٣) نظري + (٠) عملي معتمد	MSNO 621
This course will be offered for the candidate in the second semester of the diploma program This course provides the diploma nurse with advanced knowledge and practices crucial for different oncology conditions considering special implications for each condition.			
MSNT٦١١ MSNT٦١٢	تمريض مرضى جراحة الأورام (٢) Oncology nursing Clinical (2)	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	MSNO 622
This course help diploma nurse to apply advanced practices based on the best evidence nursing practice which is needed for different oncology conditions considering special implications for each health condition and general health status of each patient.			
---	جراحة الأورام Surgical Oncology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNO 623
This course is designed to assist students in developing experience, understanding the concept of surgical oncology and special nursing implications for different oncology patients undergoing surgical oncology treatment.			
---	الجوانب النفسية والاجتماعية لمرضى الاورام Psychosocial Aspects of patients	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNO 624
Students will be able to provide a holistic care for oncology patients in different management phases which covered psychological and social issues.			
---	الرعاية التلطيفية Palliative care	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNO 625
This course provides an intensive focus on improving the quality of life of patients, care and dying of individuals and families experiencing life-threatening illness through nursing assessment and interventions to relieve pain and suffering.			
---	التمريض القائم على الدلائل Evidence Based Nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN901
The student will learn how to ask clinical questions to search common databases. The students develop skills of critical appraisal of published research. It emphasis also on how practice can be changed by the use of evidence-based nursing guidelines and quality improvement processes			

---	آداب المهنة Ethics of nursing profession	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 902
<p>This course focuses on exploration of legal and ethical issues in clinical practice, research, administration and teaching. Explores theories, models and principles of ethical decision making in nursing situations across the lifespan in a variety of settings. Nursing and health care decision making dilemmas are identified and analyzed toward refining critical thinking and advocacy on the part of the nurse. Ethical principles as a foundation of nursing practice and as a guide to teaching-learning processes are clarified.</p>			

دبلوم الدراسات العليا المهنية في تمريض الطوارئ والحالات الحرجة

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
---	تمريض العناية المركزة العامة General Intensive Care Nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNE 611
This course is designed to study knowledge regarding management of patients in critical care setting which include cardiac care unit, general intensive care unit and specialized intensive care units. This course is also intended to integrate theory with clinical practice in caring of critical care patients and nursing implications in emergency situations and/or dealing with life threaten illness or health problems.			
---	تمريض العناية المركزة العامة (عملي) General Intensive Care Nursing Clinical	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	MSNE 612
This course is designed to acquired practices and professional skills related management of patients in critical care setting which include cardiac care unit, general intensive care unit and specialized intensive care units. This course is also intended to integrate theory with clinical practice in caring of critical care patients and nursing implications in emergency situations and/or dealing with life threaten illness or health problems.			
---	باثوفسيولوجي Pathophysiology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNE 613
This course focuses on human responses to illness expressed at the physiological and Path physiological process occurred according to each patient condition. Human responses will be examined in terms of assessments appropriately of the selected problems, rationale for nursing and medical interventions, and therapeutic effectiveness			
---	تقييم صحي لمرضى العناية المركزة Health Assessment for Intensive Care patient	٢ ساعة معتمدة (١) نظري + (١) عملي معتمد	MSNE 614
This course is designed to assist professional nurses in developing interviewing skills, physical assessment techniques, and preventative health interventions when working with diverse and vulnerable populations specially critical and emergency patients. The importance of therapeutic communication skills in performing a detailed health assessment is emphasized. The patterns of healthy individuals will be examined and used as a reference point for health assessment, health maintenance, and health education. Cultural and socioeconomic aspects of health behavior and health assessment will be integrated throughout the course.			
---	علم الأدوية Pharmacology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNE 615
This course focuses on examining the major and common categories of pharmacologic agents that used for critical care patients and emergency conditions. In addition to application of these pharmacologic agents in clinical nursing practice of critical and emergency patients. This course emphasis also on understanding the physiological actions of these drugs, expected patient responses, major side effects, and nursing implications accordingly.			

---	الأمان البيئي في وحدات العناية الحرجة Environmental Safety in the Critical Care Units	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	MSNE 616
This course focuses on the nurses' role in providing safe environment for the critically ill patients, application of the infection control measures, the safe use of relevant technology, hazards confronting the critically ill patients and their families			
MSNE 611	تمريض الطوارئ Emergency Care Nursing	٣ ساعة معتمدة (٣) نظري + (٠) عملي معتمد	MSNE 621
This course is designed to develop a comprehensive knowledge related to advanced nursing practice in the management of selected dysfunctions/alterations commonly seen in the adult emergencies. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for patients with problems commonly seen in the accident, emergency, and disaster settings. Through ongoing clinical experience, students implement the nursing process when caring for patients who are in the emergency status or involved in disasters, and apply the clinical decision-making process in the care of these patients in all phases of the trauma cycle or emergency situations. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized Concepts to be explored include triage and resuscitative needs, trauma management, medical and surgical emergencies, and toxicology.			
---	تمريض الطوارئ (عملي) Emergency Care Nursing Clinical	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	MSNE 622
This course is designed acquired professional skills and practical foundation for advanced nursing practice in the management of selected dysfunctions/alterations commonly seen in the adult emergencies. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for patients with problems commonly seen in the accident, emergency, and disaster settings. Through ongoing clinical experience, students implement the nursing process when caring for patients who are in the emergency status or involved in disasters, and apply the clinical decision-making process in the care of these patients in all phases of the trauma cycle or emergency situations. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized Concepts to be explored include triage and resuscitative needs, trauma management, medical and surgical emergencies, and toxicology			
---	طب الطوارئ Emergency Medicine	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNE 623
This course focuses on emergency and trauma nursing practice in emergency units. It examines theory and practical application of various nursing management related to Core body system function and critical health impairment. It presents course matter from medical, surgical fundamental to life threatening conditions in emergency care areas.			

---	الجوانب النفسية لمرضى العناية الحرجة Psychological Aspects of Critical Care patients	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNE 624
-----	--	---	-----------------

Students will refine advanced practice skills in the comprehensive clinical management of psychobiological problems of the critically ill patients. The student will synthesize relevant psychotherapeutic nursing modalities with the management of common health problems into the client's plan of care, and evaluate the effectiveness of these interventions.

---	المشورة في العناية الحرجة Critical Care Counseling	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNE 625
-----	--	---	-----------------

This course aims to increase awareness of how the delivery and acceptance of health care may be influenced by social, cultural, and environmental factors. It will provide an overview of how these factors influence a person's response to stressors, daily health and living needs.

---	التمريض القائم على الدلائل Evidence-Based Nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 901
-----	---	---	----------------

This course focuses on the best clinical nursing practice and integrating up to date research in nursing clinical skills with the applied nursing practice in caring of emergency and critical care patients. Moreover, the students will be able to developed and could apply a framework for systematic Evidence-Based Quality Improvement (EBQI) that leads to improvement for one or more targeted conditions.

---	آداب المهنة Ethics of nursing profession	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 902
-----	--	---	----------------

This course focuses on exploration of legal and ethical issues in clinical practice, research, administration and teaching. Explores theories, models and principles of ethical decision making in nursing situations across the lifespan in a variety of settings. Nursing and health care decision making dilemmas are identified and analyzed toward refining critical thinking and advocacy on the part of the nurse. Ethical principles as a foundation of nursing practice and as a guide to teaching-learning processes are clarified.

دبلوم الدراسات العليا المهنية في التحكم في العدوي
الفصل الدراسي الأول
المقررات الاجبارية

المقررات اللازمة	اسم المقرر باللغة العربية / الانجليزية	عدد الساعات (معتمدة)	كود المقرر
---	باثولوجي Pathology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNIC 611

By the end of this course diploma student will be able to discuss and differentiate between different pathologic conditions and utilize diagnostic pathology in clinical setting during caring of patients with common infectious disease.

---	المبادئ العالمية لمكافحة العدوى Universal infection control guidelines	٣ ساعة معتمدة (٣) نظري + (٠) عملي معتمد	MSNIC 612
This course will be taught in the first semesters of the diploma program. This course focuses on the knowledge regarding standard infection control guidelines and measures, environmental services, Prevention and management of infected materials or situations as sharps injury, and management of blood and body fluid spills.			
---	المبادئ العالمية لمكافحة العدوى (عملي) Universal infection control guidelines (Clinical)	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	MSNIC 613
This course will be taught in the first semesters of the diploma program. This course focuses on the standard practice regarding infection control guidelines and measures, environmental services, practice related to prevention and management of infected substances or situations that occurs during in clinical field or associated with nursing practice as dealing with sharp materials, injury could happened during patient intervention, and management of blood and body fluid spills.			
---	اجراءات مكافحة العدوي للامراض المعدية Infection control measures for infectious diseases	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	MSNIC 614
This course will be taught in the first semesters of the diploma program. This course focuses on Infection control measures for communicable diseases (Infectious Diseases) regulations, antibiotic stewardship, and infection control strategies for antibiotic resistant organisms.			
---	علم وبائيات Epidemiology	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	MSNIC 615
This course will be taught in the first semesters of the diploma program. This course focuses on concepts and scientific methods used in epidemiology to assess and investigate any health problem and uses of descriptive and analytical epidemiology.			
---	Microbiology	٢ ساعة معتمدة (١) نظري + (١) عملي معتمد	MSNIC 616
This course will be taught in the first semesters of the diploma program. This course focuses on microbiology topics include the diagnosis, transmission and surveillance of infectious diseases.			

الفصل الدراسي الثاني
المقررات الاجبارية:

المقررات اللازمة	اسم المقرر باللغة العربية / الانجليزية	عدد الساعات (معتمدة)	كود المقرر
---	التحكم في العدوي في المجالات العملية Infection control in practical settings	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNIC621
This course will be taught in the second semesters of the diploma program. This course focuses on infection control in general and specific health care institutions, infection control practices in out-patient healthcare settings, and institution specialized for infectious health problems.			
---	التحكم في العدوي في المجالات العملية (عملي) Infection control in practical settings (Clinical)	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	MSNIC622
This course focuses on clinical practice and applied measures for infection control in general and in special health care facilities. Additionally, this course will help the diploma student to apply infection control advanced practice based on the best evidence of nursing practice for general and specific health diseases or condition in different health care facilities with consideration of each health care setting.			
---	طفيليات Parasitology	٣ ساعة معتمدة (٢) نظري + (١) عملي معتمد	MSNIC623
At the end of the course the student will acquire the knowledge about different parasites that infected human, and using this knowledge in managing patient .			
---	علم الأدوية Pharmacology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNIC624
At the end of the course the diploma student will be able to understand the pharmacological properties of major drug groups treat different types of human infection with special emphasis on clinical application through administer medications			
---	مكافحة العدوي البيئية ومفاهيم الجودة Environmental infection control .and quality concepts	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSNIC625
This course will be taught in the second semesters of the diploma program. This course focuses on environmental services, policy for Central Sterile Supply Department (CSSD), auditing, management and communication and quality concepts of infection control			
---	التمريض القائم على الدلائل Evidence-Based Nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 901

This course focuses on the best clinical nursing practice and integrating up to date research in nursing clinical skills with the applied nursing practice in caring of emergency and critical care patients. Moreover, the students will be able to developed and could apply a framework for systematic Evidence-Based Quality Improvement (EBQI) that leads to improvement for one or more targeted conditions.

---	آداب المهنة Ethics of nursing profession	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 902
-----	--	---	---------

This course focuses on exploration of legal and ethical issues in clinical practice, research, administration and teaching. Explores theories, models and principles of ethical decision making in nursing situations across the lifespan in a variety of settings. Nursing and health care decision making dilemmas are identified and analyzed toward refining critical thinking and advocacy on the part of the nurse. Ethical principles as a foundation of nursing practice and as a guide to teaching-learning processes are clarified.

٢- تمريض الأمومة و النساء والتوليد دبلوم الدراسات العليا المهني في التوليد

المقررات اللازمه	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
---	التوليد (١) Midwifery (1)	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	OBG611

By completion of this course, students will be able to provide care to women in normal situation throughout the childbearing cycle. This course is designed to focus on continuing the application of theoretical basis of normal prenatal, intra partum and postnatal as well as newborn's care.

---	التوليد عملي (١) Midwifery Clinical (1)	٣ ساعات معتمدة (٠) نظري + (٣) عملي معتمد	OBG612
-----	---	--	--------

This course focus on develops students' skills in conducting prenatal, intra natal and postnatal care as well as students will develop skills in providing labor support, monitoring maternal & fetal well-being. And have integrated theoretical and practical content progressively.

---	تشريح الجهاز التناسلي للأنثى Anatomy of female reproductive system	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	OBG613
-----	--	---	--------

The course is designed to provide the students with the basic knowledge about the anatomical structure of the female pelvis and fetal skull.

---	طب أمراض النساء والتوليد (١) Obstetrics & gynecologic Medicine (1)	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG614
-----	--	---	--------

This course is designed to focus on knowledge and skills related to medical aspect of female reproductive anatomy & physiology from menarche through menopause and provides an introduction to women's health concerns (sexuality and sexual dysfunction, fertility & infertility) and management of common gynecological problems, in addition the course focus on basic knowledge and skills related to normal pregnancy, labor and puerperium.			
---	مقدمة في علم الأجنة Introduction Embryology	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	OBG615
This course focuses on fundamentals of human embryology. Emphasis is given to explain how the various organs and tissues develop and focuses on fetal life; also, abnormalities of development, produce malformations of the adult human structure will be presented to the postgraduate student.			
	علم الأدوية في النساء والتوليد	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG616
This course includes foundational information about various types of medications and immunizations relevant to obstetrics and gynecology practices; emphasis is given to action of medications, indications, contraindications and side effects of drugs as well as legal responsibilities and role of nurses around using medications.			
OBG611 OBG612	التوليد (٢) Midwifery (2)	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	OBG621
By completion of this course, students will be able to provide care to women in critical and abnormal situation throughout the childbearing cycle. This course is designed to focus on to introduce the theoretical basis of abnormal situation in various phases during pregnancy, labor and postpartum in addition high risk fetus.			
OBG611 OBG612	التوليد (٢) عملي Midwifery (2) Clinical	٣ ساعات معتمدة (٠) نظري + (٣) عملي معتمد	OBG622
This course includes an in-depth study of midwifery management of the abnormal prenatal, intra partum & immediate postnatal complications. There will be an emphasis on the identification of the high-risk fetus & variations in fetal growth and development.			
OBG613	طب أمراض النساء والتوليد (٢) Obstetrics & gynecologic Medicine (2)	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG623
This course is designed to focus on addressing complex issues throughout a woman life span in the area of obstetrics & gynecological well-being. It covers a variety of topics including health maintenance, gynecologic screening, and family planning as well as abnormal and critical situation during pregnancy, labor and postpartum. The course will enable nurse-midwives to identify when consultation, collaborative management, or referral to specialists if needed.			
---	خدمات رعاية الأم والطفل Maternal & Child Health services	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG624

This course provides the postgraduate student with a basic theoretical knowledge of MCH services; formal health care systems in Egypt as they related to midwifery practice. In addition, builds on primary care of women and children across the life span, and focuses on advanced clinical diagnosis and treatment of select women and children physical health problems.

---	العلاج البديل فى أمراض النساء والتوليد Complementary therapy in midwifery & gynecology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG 625
-----	--	---	----------------

This course provides the postgraduate students with an overview of the philosophy and practice of complementary alternative therapies (CAT). It focuses on the role of complementary alternative therapies on health promotion during the maternity cycle and in management of health problems of obstetrical and gynecological.

---	التمريض القائم على الدلائل Evidence-Based Nursing	2 ساعة معتمدة (٢) نظري + (0) عملي معتمد	GEN901
-----	---	---	---------------

This course focuses on the best clinical nursing practice and integrating up to date research in nursing clinical skills with the applied nursing practice in caring of emergency and critical care patients. Moreover, the students will be able to developed and could apply a framework for systematic Evidence-Based Quality Improvement (EBQI) that leads to improvement for one or more targeted conditions.

---	آداب المهنة Ethics of nursing profession	2 ساعة معتمدة (٢) نظري + (0) عملي معتمد	GEN 902
-----	--	---	----------------

This course focuses on exploration of legal and ethical issues in clinical practice, research, administration and teaching. Explores theories, models and principles of ethical decision making in nursing situations across the lifespan in a variety of settings. Nursing and health care decision making dilemmas are identified and analyzed toward refining critical thinking and advocacy on the part of the nurse. Ethical principles as a foundation of nursing practice and as a guide to teaching-learning processes are clarified.

٣ - تمريض الأطفال

دبلوم الدراسات العليا المهني في تمريض الأطفال

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
---	تمريض الأطفال (١) Pediatric nursing(1)	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	PED 611

Pediatric Nursing is a study of the basic aspects of growth and development through the life span from infant to adolescent. Pediatric Nursing is also a study of childhood disease and child care from infancy through adolescence.

---	تمريض الأطفال (١) عملي Pediatric nursing(1) Clinical	٣ ساعات معتمدة (٠) نظري + (٣) عملي معتمد	PED 612
-----	--	--	----------------

This study will focus on the care of the well and the ill child and utilize the nursing process through the life span from infant to adolescent

---	طب الأطفال Pediatric medicine	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED613
This course is designed to emphasize theory and practical application of various management related to core body system function and health impairment. This course focuses on child's history taking and child's physical assessment including growth and development.			
---	علم نفس الطفل Child Psychology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 614
This course gears to expanding the master nurse knowledge in the methods, theories and main concepts used by psychologists to develop a real insight into the world of children			
---	تثقيف صحي Health education	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 906
This course is taught to provide participant with the necessary knowledge and skills that prepare them to be competent in providing health education& counseling for children and their mothers			
PED 611 PED 612	تمريض الأطفال (٢) Pediatric nursing (2)	٣ ساعة معتمدة (٣) نظري + (٠) عملي معتمد	PED 621
This theoretical focuses on the care of children from birth through adolescence. The effects of acute and chronic illness on growth and development are studied in the acute and community care setting.. Ethical issues are discussed regarding the relationship to the child and family, including issues such as child abuse, informed consent, and the impact of diverse cultural and spiritual beliefs on health care decisions in the family.			
PED 611 PED 612	تمريض الأطفال (٢) عملي Pediatric nursing(2) Clinical	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	PED 622
This clinical focuses on education of the child and family on health promotion, disease prevention, and safety issues are addressed			
---	علم الأدوية للأطفال Pharmacology for children	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 623
This course provides the knowledge and skills to assess, diagnose, and pharmacologically manage a child's common health problems in a safe, high quality, cost-effective manner. Emphasis is on the development of therapeutic decision-making in drug selection for the child based on health problems, individual variations, and economic considerations. Focus is on prescriptive practice, child education and monitoring therapeutic response to pharmacological agents in diverse child across the lifespan.			
---	جراحة الأطفال Pediatric Surgery	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 624
This course is geared toward updating the diploma nurse knowledge in the area of surgical intervention related to sever ill children. Emphasis will be directed toward surgical problems in children related to different body systems, pre and post operative care of children.			
---	التقنيات الحديثة في تمريض	٢ ساعة معتمدة (٢) نظري + (٠)	PED 625

	الأطفال Modern techniques in pediatric nursing	عملي معتمد	
--	--	------------	--

This course is designed to provide the student with the technological changes and the skillful use of advanced technology to overcome severe health disturbance of the critically ill patients

---	التمريض القائم على الدلائل Evidence-based nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 901
-----	---	---	----------------

This course focuses on the best clinical nursing practice and integrating up to date research in nursing clinical skills with the applied nursing practice in caring of emergency and critical care patients. Moreover, the students will be able to developed and could apply a framework for systematic Evidence-Based Quality Improvement (EBQI) that leads to improvement for one or more targeted conditions.

---	آداب المهنة Ethics of nursing profession	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 902
-----	--	---	----------------

This course focuses on exploration of legal and ethical issues in clinical practice, research, administration and teaching. Explores theories, models and principles of ethical decision making in nursing situations across the lifespan in a variety of settings. Nursing and health care decision making dilemmas are identified and analyzed toward refining critical thinking and advocacy on the part of the nurse. Ethical principles as a foundation of nursing practice and as a guide to teaching-learning processes are clarified.

دبلوم الدراسات العليا المهنية في التمريض الحرج لحديثي الولادة

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
---	تمريض الحالات الحرجة لحديثي الولادة (١) Intensive Nursing care for newborns (1)	٣ ساعة معتمدة (٣) نظري + (٠) عملي معتمد	PEDCN611

This course will be offered for the candidate in the diploma program. This course provides the diploma nurse with basic scientific knowledge and skills necessary for proficient practice in the clinical setting for the care of normal and high-risk neonates using critical; thinking and clinical decision-making.

---	تمريض الحالات الحرجة لحديثي الولادة (١) (عملي) Intensive Nursing care for newborns (1) Clinical	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	PEDCN612
-----	---	---	-----------------

This clinical focus on basic skills necessary for proficient practice in the clinical setting for the care of normal and high-risk neonates using critical; thinking and clinical decision-making and develop nursing care plan to overcome the life threatening problems for normal and high-risk neonates

---	طب الحالات الحرجة لحديثي الولادة Medicine embarrassment	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PEDCN613
-----	---	---	-----------------

	for newborns		
<p>This course is designed to provide a course of study central to critical care nursing practice. It emphasizes theory and practical application of various management related to core body system function and critical health impairment. This course focuses on child's history taking and child's physical assessment including growth and development. Emphasis will be put on critical problems of neonates.</p>			
---	باتوفسيولوجي Pathophysiology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PEDCN614
<p>This course gears to expanding the diploma nurse knowledge in major physiologic alteration associated with pediatric disorders. The principles of body functions and pathophysiological changes that occur as a result of disease and homeostatic changes in the body. Epidemiology, pathophysiological mechanisms, related system interaction and total body functioning are examined.</p>			
---	جراحة الأطفال حديثي الولادة Neonatal surgery	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PEDCN615
<p>This course will be taught in the Diploma program. It is geared toward updating the diploma nurse knowledge in the area of surgical intervention related to critically ill children. Emphasis will be directed toward congenital and acquired surgical problems in children related to different body systems.</p>			
PEDCN611	تمريض الحالات الحرجة لحديثي الولادة (٢) Nursing care for newborns (2)	٣ ساعة معتمدة (٣) نظري + (٠) عملي معتمد	PEDCN621
<p>This course is designed to provide the students the opportunity to integrate physiological principles in the care of neonates who are experiencing critical illness or injury and to explore the concern of their families.</p>			
PEDCN611	تمريض الحالات الحرجة لحديثي الولادة (٢) (عملي) Nursing care for newborns Clinical (2)	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	PEDCN622
<p>This clinical of this course will be given to the core body systems alterations and resuscitation needs of neonate experiencing life threatening illness. As well as the implementation and evaluation of therapeutic nursing and medical intervention for neonates with complex health care needs in the critical care environment necessary for safe practice.</p>			
---	الجوانب النفسية والاجتماعية للأسرة Psychological and social aspects of the family	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PEDCN 623
<p>This course is geared toward updating the diploma nurse knowledge in the area of dynamics of family relationship. It focuses on psychosocial aspects of families having children with critical health problems. It prepares the diploma nurse to be competent in helping family</p>			

members to cope and adjust to real life situations.			
---	جراحة الاطفال لحدیثی الولادة Neonatal surgery	٢ ساعة معتمدة (٢) نظری + (٠) عملی معتمد	PEDCN 624
This course focuses on surgical intervention related to critically ill children. Emphasis will be directed toward congenital and acquired surgical problems in children related to different body systems.			
---	طرق مكافحة العدوی Infection control methods	٢ ساعة معتمدة (٢) نظری + (٠) عملی معتمد	GEN 904
This course provides chances for student nurses to identify risk factors that cause infection in different pediatric settings. The student is prepared to practice proper standard measures of infection control.			
---	التمریض القائم علی الدلائل Evidence-based nursing	٢ ساعة معتمدة (٢) نظری + (٠) عملی معتمد	GEN 901
This course focuses on the best clinical nursing practice and integrating up to date research in nursing clinical skills with the applied nursing practice in caring of emergency and critical care patients. Moreover, the students will be able to developed and could apply a framework for systematic Evidence-Based Quality Improvement (EBQI) that leads to improvement for one or more targeted conditions.			
---	آداب المهنة Ethics of nursing profession	٢ ساعة معتمدة (٢) نظری + (٠) عملی معتمد	GEN 902

PSY611 PSY612	التمريض النفسي والصحة العقلية(٢) Psychiatric nursing and mental health Clinical(2)	٣ ساعات معتمدة (٠) نظري + (٣) عملي معتمد	PSY622

This course focuses on clinical practice in an area of mental health service provision. Course provides opportunities to study issues and topics of particular interest such as dual diagnosis, psycho- social and psycho- educational interventions, mental health care for adult people, illness management and recovery and mental health in primary care. After the course the student will provide care to individuals, families or populations who are at risk for developing or who have common, acute or chronic mental health problems, illness or crises.

---	النظم العلاجية للأمراض النفسية Regimens for mental illnesses	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PSY623
-----	--	--	---------------

The goal of the course is to explore the biological basis of neuropsychiatric dysfunction and resulting behavioral syndromes. The contributions of a broad expanse of disciplines in preclinical and clinical arenas to the etiology, diagnosis, treatment, and management of brain dysfunction will be presented. Emphasis is placed on critical evaluation of research strategies and hypotheses used in the investigation & treatment modalities of neural mechanisms involved in the control of complex behaviors.

---	المنظور النفس اجتماعي للإدمان Psycho social perspective of addiction	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PSY624
-----	--	--	---------------

This course has been developed to examine the physical, psychological, and sociological aspects of alcohol and drug use, abuse, and dependence. The course will provide an opportunity for students to examine their belief system about drug and alcohol use and will review the processes of addiction/dependence including the signs, symptoms, and behavior patterns.

---	علم نفس عام General Psychology	٢ ساعة معتمدة (٢) نظري+(٠) عملي معتمد	PSY625
-----	--	--	---------------

Introduction to scientific psychology as applied to humans behavior, including research methods, physiological factors, learning, motivation, emotions, personality, adjustment, stress, psychological disorders, and therapies. These principles will be applied to the human experience.

---	التمريض القائم على الدلائل Evidence-based nursing	٢ ساعة معتمدة (٢) نظري+(٠) عملي معتمد	GEN 901
-----	---	--	----------------

This course focuses on the best clinical nursing practice and integrating up to date research in nursing clinical skills with the applied nursing practice in caring of emergency and critical care patients. Moreover, the students will be able to developed and could apply a framework for systematic Evidence-Based Quality Improvement (EBQI) that leads to improvement for one or more targeted conditions.

---	آداب المهنة Ethics of nursing profession	٢ ساعة معتمدة (٢) نظري+(٠) عملي معتمد	GEN 902
-----	--	--	----------------

This course focuses on exploration of legal and ethical issues in clinical practice, research,

administration and teaching. Explores theories, models and principles of ethical decision making in nursing situations across the lifespan in a variety of settings. Nursing and health care decision making dilemmas are identified and analyzed toward refining critical thinking and advocacy on the part of the nurse. Ethical principles as a foundation of nursing practice and as a guide to teaching-learning processes are clarified.

5 - تمرير صحة المجتمع

دبلوم الدراسات العليا المهنية في تمرير المسنين

المقررات اللازمة	اسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
---	تمرير المسنين (1) Geriatrics Nursing (1)	3 ساعات معتمدة (3) نظري + (0) عملي معتمد	COMG611
This course provides a basic theory of geriatric. Emphasis on the promotion of health and prevention of disease as proposed on the concept of health and illness during the life process.			
---	تمرير المسنين عملي (1) Geriatric Nursing (1) Clinical	3 ساعات معتمدة (0) نظري + (3) عملي معتمد	COMG612
This course provides the learner with clinical experience to develop their skills in providing comprehensive care for the healthy and sick elderly in a variety of settings			
---	طب الشيخوخة Geriatric medicine	2 ساعة معتمدة (2) نظري + (0) عملي معتمد	COMG 613
This course focuses on the pattern of illness in old age, common diseases associated with old age, assessment and clinical management of the sick elderly			
---	فسيولوجيا المسنين Psychological and social aspects of the elderly	2 ساعة معتمدة (2) نظري + (0) عملي معتمد	COMG 614
A comprehensive overview of psychological and social aspects of aging. Topics will include age-related changes in sensation/perception, cognition, personality, social psychology neuropsychology and psychopathology. In addition, common disorders of aging will be reviewed, including senile dementia of the Alzheimer's type, depression and age-associated memory loss.			
---	علم الأدوية للمسنين Pharmacology for the elderly	2 ساعة معتمدة (2) نظري + (0) عملي معتمد	COMG 615
This course will introduce the student to the most common drugs used by the elderly, drug reaction, interaction, contraindications and said effect.			
COMG611 COMG612	تمرير المسنين (2) Geriatrics Nursing (2)	3 ساعات معتمدة (3) نظري + (0) عملي معتمد	COMG 621

This course provides a basic theory essential to the nursing assessment and management strategies appropriate to the elderly according to their health problems			
COMG611 COMG612	تمريض المسنين (٢) عملي Geriatrics Nursing(2) Clinical	٣ ساعات معتمدة (٠) نظري + (٣) عملي معتمد	COMG 622
This course provides the learner with clinical experience to develop their skills in providing comprehensive care for the healthy and sick elderly in a variety of settings			
---	الجوانب النفسية والاجتماعية للمسنين Physiology for elderly	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COMG 623
This course is designed to provide the students with the physiological changes associated with ageing and affecting the different body systems and their related consequences.			
---	إدارة وتقييم الخدمات الخاصة بالمسنين Management and assessment services for the elderly	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COMG 624
This course is designed to provide students with an appreciation of long-term care, its past, present and future roles within the overall health care system in our country. Major issues in long-term care facing the present and future elderly population, such as institutionalization, financing, access, managed care, quality and case management will be discussed in detail.			
---	تغذية المسنين Nutrition for elderly	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COMG 625
This course focuses on the assessment and identification of the nutritional needs and requirements of the elderly, common nutritional problems, risk factors and interventions.			
---	التمريض القائم على الدلائل Evidence-based nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 901
This course focuses on the best clinical nursing practice and integrating up to date research in nursing clinical skills with the applied nursing practice in caring of emergency and critical care patients. Moreover, the students will be able to developed and could apply a framework for systematic Evidence-Based Quality Improvement (EBQI) that leads to improvement for one or more targeted conditions.			
---	آداب المهنة Ethics of nursing profession	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 902
This course focuses on exploration of legal and ethical issues in clinical practice, research, administration and teaching. Explores theories, models and principles of ethical decision making in nursing situations across the lifespan in a variety of settings. Nursing and health care decision making dilemmas are identified and analyzed toward refining critical thinking and advocacy on the part of the nurse. Ethical principles as a foundation of nursing practice and as a guide to teaching-learning processes are clarified.			

دبلوم الدراسات العليا المهني في تمريض صحة الأسرة
الفصل الدراسي الأول

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
---	تمريض صحة الأسرة (١) Family Health Nursing (1)	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COMFH 611
The family health nursing course enables the student to focus upon the holistic approach towards the family. Where they will discuss the culture, needs, problems that the families encounter and how to approach or intervene when necessary.			
---	تمريض صحة الأسرة (١) Family Health Nursing (1) Clinical	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	COMFH 612
The family health nursing practical course provides students with the opportunity to assess the health needs of selected families in the community with selected health			
---	التقييم الصحي للأسرة Family health assessment	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COMFH 613
The course is geared towards introducing nursing students to critical thinking skills, relative to family health promotion. Technical skills needed for family health assessment are highly emphasized which involves comprehensive collection and analyzing data describing family state of wellness, strengths and weakness.			
---	صحة البيئة Environmental Health	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	COMFH 614
This course introduces the students to the concepts, and new trends of environment. The course covers the main international environmental issue from an interdisciplinary perspective, and also focuses on issues relevant to Egypt. This course will enable the students to gain border knowledge and experience contributing to their professional development.			
---	دراسة المجتمع ومشاكله الصحية Community study and health problems	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COMFH 615
This course introduces students to the different socio-cultural factors affecting the health in the community. Particular emphasis is placed on the most common health problems in the community.			
---	تثقيف صحي Health education	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 906
This course introduces the students to the concepts, theories and new trends of health education to raise people's health awareness and change their knowledge, attitudes, and health behaviors.			
COMFH 611 COMFH 612	تمريض صحة الأسرة (٢) Family Health Nursing (2)	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COM FH621
This course focuses on the assessment of individual and families in health and illness. Provides experience in health promotion, problems identification and management of common health problems. It covers the main theoretical basis for promoting family health			

COMFH 611 COMFH 612	تمريض صحة الأسرة عملي (٢) Family Health Nursing (2) Clinical	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	COM FH622
This course focuses on the assessment of individual and families in health and illness and applying family nursing process. Emphasizes the use of existing knowledge to guide advanced nursing practice in culturally competent interventions for the promotion of health.			
---	وبائيات The epidemiology	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	COMFH 623
The course introduces the study designs applied to human populations, including randomized trials and four types of observational studies (cohort, case-control, cross-sectional, ecological). Because cause-and-effect relations are at the heart of epidemiologic research, numerous related topics are taught, including causal inference, and bias. There is a quantitative pre-test required for this course.			
---	الرعاية المنزلية للأسرة Home care for family	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COMFH 624
This course is directed toward developing and enhancing student's capabilities for understanding and analyzing the basic concepts and principles organizing nursing care at home. The student will be able to provide restorative and maintenance care to clients and family to promote independence and improve the quality of their life in the community.			
---	الجوانب الإجتماعية والثقافية المتعلقة بصحة الأسرة Social and cultural aspects of family health	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COMFH 625
This course provides an overview of the cultural and social variations and their impact on family health. The course covers the basic culture context. This course will enable the students to gain knowledge contributing to their professional development.			
---	الاسعافات الأولية First Aid	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 907
This course of first aid is designed to master candidate nurses to be competent in providing basic skills related to first aid as: wound, hemorrhage, burn, fracture, shock, medical emergency and unconsciousness.			
---	التمريض القائم على الدلائل Evidence-based nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 901
This course focuses on the best clinical nursing practice and integrating up to date research in nursing clinical skills with the applied nursing practice in caring of emergency and critical care patients. Moreover, the students will be able to developed and could apply a framework for systematic Evidence-Based Quality Improvement (EBQI) that leads to improvement for one or more targeted conditions.			
---	آداب المهنة Ethics of nursing profession	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN 902
This course focuses on exploration of legal and ethical issues in clinical practice, research,			

administration and teaching. Explores theories, models and principles of ethical decision making in nursing situations across the lifespan in a variety of settings. Nursing and health care decision making dilemmas are identified and analyzed toward refining critical thinking and advocacy on the part of the nurse. Ethical principles as a foundation of nursing practice and as a guide to teaching-learning processes are clarified.

٦- إدارة التمريض
دبلوم الدراسات العليا المهنية في إدارة التمريض
الفصل الدراسي الأول

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
---	أسس الإدارة في التمريض Foundations in nursing administration	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	NAD611
The Basics of nursing administration course aims to prepare graduate students in the field of nursing management to fill managerial positions in various health institutions. The course will provide participants with the knowledge and skills to upgrade their administrative competence to can function in leadership and management roles in the constantly changing health care environment. The basics of nursing administration derive from management theories, concepts and general principles of management science.			
---	أسس الإدارة في التمريض (عملي) Foundations in nursing administration Clinical	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	NAD612
In this course the student will apply the concepts, principles and elements of the administrative process in the context of working with various health institutions and develop skills in maintaining administrative competence with effective supervision to provide quality care			
---	التسجيل والتوثيق Registration and documentation	٢ ساعة معتمدة (١) نظري + (١) عملي معتمد	NAD613
The course focuses on provide graduate students with basics types of records and reports, characteristics, importance and advanced medical record documentation and regulatory changes. Legal and ethical requirements for reporting and recording patient care and responsibilities of nurses at all levels are emphasized. Critically analyze documentation in health care delivery system.			
---	الاتجاهات الحديثة في إدارة التمريض Recent trends in the management of nursing	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	NAD614

<p>This course focuses on new trends in nursing leadership and management and its application in different health care and educational settings. Provides an overview of the evolution of nursing as a profession and course explores the major issues and trends in nursing management. Strategies that the nurse leader can use in nursing practice will be discussed</p>

<p>This course introduces students to the different socio-cultural factors affecting the health in the community. Particular emphasis is placed on the most common health problems in the community.</p>			
---	تنقيف صحي (١)	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN918
<p>This course introduces the students to the concepts, theories and new trends of health education to raise people's health awareness and change their knowledge, attitudes, and health behaviors.</p>			

---	العلاقات الإنسانية Human Relation	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN919
This course is geared to provide postgraduate students with basics; traditional and innovative knowledge and skills needed for nurses to communicate effectively with one self and others and treat one self and others to achieve intended objectives in different nursing professional settings.			
---	الكتابة العلمية Scientific Writing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN920
This course is geared to provide postgraduate students with basic knowledge and practices on how to write effectively scientific research proposal and reports; thesis, and to prepare other professional materials for presentation or publication.			

١ - قسم التمريض الباطني و الجراحي
تخصص الماجستير في علوم التمريض الباطني والجراحي
يدرس الطالب المقررات الإجبارية الآتية

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
-----	تمريض باطنى وجراحي (١) Internist and surgical nursing (1)	٣ ساعة معتمدة (٣) نظري + (٠) عملي معتمد	MSN 721
This course is geared towards enhancement of the candidate's cognitive and clinical skills in diagnosing and management of the adult patients with medical surgical alterations. System dysfunctions as well as holistic nursing interventions will be discussed, and applied on alteration in immune, C.V.S, respiratory, Neurology, and Ophthalmology. New technologic changes and updates in diagnosis and therapies will be also included.			
---	تمريض باطنى وجراحي (عملي) (١) Medical and surgical nursing Clinical(1)	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	MSN 722
This course is geared towards enhancement of the candidate's clinical skills needed for management of the adult patients with medical surgical alterations and system dysfunctions as well as holistic nursing interventions will be discussed, and applied on alteration in immune, C.V.S, respiratory, Neurology, and Ophthalmology. New technologic changes and updates in clinical skills and therapies will be also included.			
---	علم وظائف الأعضاء Physiology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSN 723
This course aims to enhancement of student knowledge regarding of detail physiological functions of neurological, respiratory system which needed for applying nursing intervention of these systems disorder			

---	علم أمراض Pathology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSN 724
This course aims to enhancement of student advanced knowledge regarding the pathological process of common dysfunction of neurological, respiratory system which needed for applying nursing intervention of these systems disorder and evaluate the patient response to medical and nursing intervention.			
---	أمراض باطنه Internal Medicine	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSN 725
This course aims to expanding masters nursing student's knowledge in medicine, in view of major advanced in monitoring procedures and treatment approaches. Some systemic disorders in relation to pathophysiological changes, clinical picture, diagnostic evaluations, differential diagnosis and complications will be included as well as the management approaches.			
---	التمريض القائم على الدلائل Evidence-based nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN901
This course focuses on the best clinical nursing practice and integrating up to date research in nursing clinical skills with the applied nursing practice in caring of emergency and critical care patients. Moreover, the students will be able to developed and could apply a framework for systematic Evidence-Based Quality Improvement (EBQI) that leads to improvement for one or more targeted conditions.			
	التطورات الحديثة في التمريض الباطني و الجراحي Recent developments in Medical Surgical Nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSN 727
This course addresses the main trends that influence nursing education, research, and practice. It follows the trend over time to show how and why it is ever changing, and how it shapes the nursing profession. It further introduces the novel and resurging issues that are currently under debate because of their influence on nursing.			
MSN 721 MSN 722	تمريض باطنى وجراحي (٢) Medical and surgical nursing (2)	٣ ساعة معتمدة (٣) نظري + (٠) عملي معتمد	MSN731
This course is a continuation of advanced medical surgical nursing one. Other body system disorders and functional alterations will be further emphasized throughout course one and Holistic nursing intervention will be discussed and applied on alteration in renal, gastrointestinal tract (GIT), orthopedic, integumentary, and ear, nose and throat (ENT).			
MSN 721 MSN 722	تمريض باطنى وجراحي (٢) عملي Medical and surgical nursing (2) Clinical	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	MSN732
This course aims to provide student with advanced medical surgical nursing skills based one best evidence practice. Other body system disorders and functional alterations will be further emphasized throughout course one and Holistic nursing intervention skills or practice will be discussed and applied on alteration in renal, gastrointestinal tract (GIT), orthopedic, integumentary, and ear, nose and throat (ENT).			

	المفاهيم الحديثة في التمريض الباطني و الجراحي Modern concepts in Medical Surgical Nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSN 733
--	--	---	----------------

The course addresses the main concepts that influence nursing education, researches, and practice. It follows the trend regarding medical surgical nursing over time to show how and why it is ever changing, and how it shapes the nursing profession. It further introduces the novel and resurging issues that are currently under debate because of their influence on nursing.

	علم أدوية Pharmacology Science	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSN 734
--	--	---	----------------

This course focuses on the basic principles and techniques of administering drugs, enhancement of student knowledge and clinical skills in administering drugs, recording patient's response and drug monitoring. In addition to helping students to know their role with adverse response and drug interactions. Patient education regarding drugs information, action, uses and side effects.

	حلقات دراسية في مجال التخصص Seminar in specialized field	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSN 735
--	--	---	----------------

This is a tailored course that will be chosen and designed by both the post graduate student and the supervisor to support and complement the students' minor specialization. This can take the form of a theoretical course, a clinical experience, a field work, a library work, case studies or the like.

	مفاهيم التغذية في التمريض Nutrition concepts in nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	MSN736
--	---	---	---------------

This course is geared toward enhancement of the student knowledge and clinical skills related to adult patient nutrition. The course focuses additionally on acquiring the skills necessary to plan and deliver effective nutritional health education to adult patient with altered nutritional status. Nutritional concept as hunger and malnutrition will be discussed.

	قوانين وأداب المهنة Ethics and the laws of the profession	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN921
--	---	---	---------------

This course focuses on health care policy, ethical considerations and legal decisions that impact the delivery of health care services in various health care settings to prevent health crises, nursing malpractice, and loyalty

تخصص الماجستير في علوم تمريض الأمومة والنساء والتوليد

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
	تمريض أمراض النساء وتنظيم الأسرة	٢ ساعة معتمدة (٢) نظري + (٠)	OBG 721

	Nursing gynecology and family planning	عملي معتمد	
This course is designed to focus on women health .from puberty to menopause. Emphasizes on adolescent health including menstrual cycle, menopause and common gynecological diseases as uterine bleeding, genital tract infection. Issues related to women's reproductive health and contraception will be covered. Through integration of the sciences and evidence-based knowledge, concepts of family, environment, health, wellness, and culture will be emphasized.			
	تمريض أمراض النساء وتنظيم الأسرة (عملي) Nursing gynecology and family planning Clinical	٢ ساعة معتمدة (٠) نظري + (٢) عملي معتمد	OBG 722
This clinical course is designed to provide the student with experience to utilize evidence-based knowledge and critical thinking skills in providing nursing care to women and her family during life span. Through provide an opportunity to demonstrate clinical procedures related to women as well as different methods of family planning. Student will be expecting to integrate clinical skills in the actual health care settings.			
	تشريح الجهاز التناسلي للأنثى Anatomy of the female reproductive system	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG 723
The course is designed to provide the students with the basic knowledge about the anatomical structure of the female reproductive system and fetal skull.			
	علم نفس المرأة Psychology of Women	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG 724
This course will address the psychological theories related to gender development across the lifespan, diversity work and violence against women. In addition, in studying the psychology of women, explores a social construction of gender and its impact on the psychology of women.			
	طب النساء والتوليد Obstetrics and Gynecology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG 725
This course is designed to focus on knowledge and skills related to medical aspect of female reproductive anatomy & physiology from menarche through menopause and provides an introduction to women's health concerns (sexuality and sexual dysfunction, fertility& infertility) and management of common gynecological problems, in addition the course focus on basic knowledge and skills related to normal and abnormal pregnancy, labor and puerperium.			
	خدمات رعاية الأم و الطفل Services Maternal and Child Welfare	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG 726
This course provides the postgraduate student with a basic theoretical and practical			

<p>knowledge of MCH services; formal health care systems in Egypt as they related to midwifery practice. In addition, builds on primary care of women and children across the life span, and focuses on advanced clinical diagnosis and treatment of select women and children physical health problems.</p>			
	<p>الصحة الإنجابية Reproductive Health</p>	<p>٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد</p>	<p>OBG 727</p>
<p>This course provides the postgraduate students the basic knowledge & skills to be competent in providing reproductive & sexual health care to women during the maternity cycle. The course content will emphasize social, economic, environmental, behavioral, and political factors that affect reproductive health (adolescence, fertility, family planning, and pregnancy outcome).</p>			
	<p>التثقيف الصحي أثناء الحمل والولادة Health education during pregnancy and childbirth</p>	<p>٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد</p>	<p>OBG 728</p>
<p>This course provides the postgraduate students with the basic knowledge and skills that prepare them to be competent in providing health education & counseling for woman throughout maternity cycle. This course consists of information, role plays and student presentations designed to develop skills needed for client counseling.</p>			
	<p>التوليد Obstetrics</p>	<p>٤ ساعة معتمدة (٣) نظري + (١) عملي معتمد</p>	<p>OBG 731</p>
<p>This course is designed to build a foundation of knowledge regarding normal childbearing including variations of normal & common interventions. It focuses on the care of the women during the childbearing years. The processes of normal pregnancy and birth, high-risk pregnancy, and the care of healthy newborns are presented. Through integration of the sciences and evidence-based knowledge, concepts of family, environment, health, wellness, and culture will be emphasized.</p>			
	<p>التوليد (عملي)</p>	<p>٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد</p>	<p>OBG 732</p>
<p>This clinical course is designed to provide the student with experience to utilize evidence-based knowledge and critical thinking skills in providing nursing care to childbearing families. Clinical assignments will include caring for families during the ante partum, intra partum, postpartum, and newborn periods. Concepts of wellness, culture, infant growth and development, family integrity, and patient advocacy are used as a basis for the provision of care.</p>			
	<p>علم الوراثة والأجنة Genetics and Embryology</p>	<p>٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد</p>	<p>OBG 733</p>
<p>This course focuses on an introduction to human genetics, genetic disorders, pattern of inheritance and embryological and fetal development, both normal and abnormal, with a focus on teaching and supporting clients.</p>			
	<p>علم الأدوية في أمراض النساء والتوليد Pharmacology in obstetrics and gynecology</p>	<p>٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد</p>	<p>OBG 734</p>

This course includes foundational information about various types of medications and immunizations relevant to obstetrics and gynecology practices; emphasis is given to action of medications, indications, contraindications and side effects of drugs as well as legal responsibilities and role around using medications .

	حلقات دراسية في مجال التخصص Seminars in the area of specialization	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG 735
--	--	---	----------------

This is a very specialized course in which obstetric and gynecological nursing topics are manipulated and extensively discussed from all perspectives .Postgraduate students are expected to read, present and criticize research topics, review articles and state-of-the art relevant to the area of specialty.

	العلاج البديل في أمراض النساء Alternative Therapy in Gynecology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	OBG 738
--	---	---	----------------

This course provides the postgraduate students with an overview of the philosophy and practice of complementary alternative therapies (CAT). It focuses on the role of complementary alternative therapies modalities in the management of gynecological problems as well as pregnancy, childbirth & puerperal health problems. In addition on health promotion during maternity cycle.

	قوانين وأداب المهنة Ethics and the laws of the profession	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN921
--	---	---	---------------

The course orients the postgraduate students to their professional responsibilities, obligations and to career opportunities. It will increase the student's awareness of the serious issues that must be faced and those that will affect the future of midwifery. Emphasis is given to the Ministry of health and population polices that guide the midwifery profession, as well as women's rights during the maternity cycle.

تخصص الماجستير في علوم تمريض الأطفال

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
	تمريض الأطفال (١) Pediatric Nursing (1)	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 721

Pediatric Nursing is a study of the basic aspects of growth and development through the life span from infant to adolescent. Pediatric Nursing is also a study of childhood disease and child care from infancy through adolescence.

	تمريض الأطفال (١) عملي Pediatric Nursing (1) Clinical	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	PED 722
This clinical focuses on the care of the well and the ill child and will utilize the nursing process, education of the child and family on health promotion, disease prevention, and safety issues are addressed			
	باثوفسيولوجي Pathophysiology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 723
This course is designed to examine alterations in functions affecting individuals across the lifespan. The student will explore pathophysiological concepts utilizing biology, microbiology, and physiological sciences as a basis for the student approach. The scientific approach will provide a further understanding of the mechanisms of disease, and students will incorporate critical thinking skills with practical application. The course provides a comprehensive nursing approach to common alterations in body systems			
	علم نفس الطفل Child Psychology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 724
This course gears to expanding the master nurse knowledge in the methods, theories and main concepts used by psychologists to develop a real insight into the world of children			
	علم الأدوية للأطفال Pharmacology for children	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	PED 725
This course provides the knowledge and skills to assess, diagnose, and pharmacologically manage a child's common health problems in a safe, high quality, cost-effective manner. Emphasis is on the development of therapeutic decision-making in drug selection for the child based on health problems, individual variations, and economic considerations. Focus is on prescriptive practice, child education and monitoring therapeutic response to pharmacological agents in diverse child across the lifespan.			
	طب أطفال Pediatrics	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 726
This course is designed to emphasize theory and practical application of various management related to core body system function and health impairment. This course focuses on child's history taking and child's physical assessment including growth and development.			
	ندوات في تمريض الأطفال Specific seminars in Pediatric Nursing	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 727
Is designed to allow master's prepared registered nurses to add professional competencies which prepare them for additional areas of gainful employment. Pediatric Nurse Practitioners deliver primary health care to infants, children, and adolescents.			

	الحوادث في الأطفال Accidents in children	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 728
This course focuses on identifying children at risk. Socio-cultural, physical and environmental factors that are important in determining causes of injuries in childhood and adolescence are also discussed. The pediatric nurse will be prepared to develop a program for preventive measures and effective strategies for dealing with different childhood accidents.			
PED721 PED722	تمريض الأطفال (٢) Pediatric Nursing (2)	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PDF731
This theoretical and clinical course focuses on the care of children from birth through adolescence. The effects of acute and chronic illness on growth and development are studied in the acute and community care setting. Education of the child and family on health promotion, disease prevention, and safety issues are addressed. Ethical issues are discussed regarding the relationship to the child and family, including issues such as child abuse, informed consent, and the impact of diverse cultural and spiritual beliefs on health care decisions in the family.			
PED721 PED722	تمريض الأطفال (٢) (عملي) Pediatric Nursing (2) clinical	٣ ساعة معتمدة (٠) نظري + (٣) عملي معتمد	PDF732
This clinical focus on basic skills necessary for proficient practice in the clinical setting for the care of normal and high-risk neonates using critical; thinking and clinical decision-making and develop nursing care plan to overcome the life threatening problems for normal and high-risk neonates ,As well as the implementation and evaluation of therapeutic nursing and medical intervention for neonates with complex health care needs in the critical care environment necessary for safe practice.			
	الرعاية المركزة للأطفال Pediatric intensive care	٣ ساعة معتمدة (٢) نظري + (١) عملي معتمد	PED 733
This course is designed to provide the students the opportunity to integrate physiological principles in the care of neonates who are experiencing critical illness or injury and to explore the concern of their families. Emphasis will be given to the core body systems alterations and resuscitation needs of neonate experiencing life threatening illness. As well as the implementation and evaluation of therapeutic nursing and medical intervention for neonates with complex health care needs in the critical care environment necessary for safe practice			
	جراحة اطفال Pediatric Surgery	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED734
This course will be taught in the master program. It is geared toward updating the master nurse knowledge in the area of surgical intervention related to sever ill children. Emphasis will be directed toward surgical problems in children related to different body systems,pre and post operative care of children			

	حلقات دراسية في مجال التخصص Seminars in the area of specialization	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 735
Emphasis in this course is placed on the ability to understand and criticize recent published pediatric nursing research reports. Students learn the relevance of research strategies for utilization. Advocacy and accountability in the conduct and use of research are stressed			
	التغذية العلاجية للأطفال Therapeutic feeding for children	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PED 736
This course will be taught in the master program. It is geared toward updating the master nurse knowledge in the area of therapeutic dietary intervention with children having medical and surgical problems from infancy through adolescence.			
	قوانين و آداب المهنة Ethics and the laws of the profession	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	GEN921
This course focuses on health care policy, ethical considerations and legal decisions that impact the delivery of health care services in various health care settings to prevent health crises, nursing malpractice, and liability.			

تخصص الماجستير في علوم التمريض النفسي والصحة العقلية

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
---	تمريض نفسي وصحة عقلية (١) Psychiatric Nursing and Mental Health(1)	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	PSY721
The course is intended to provide the nursing student with a basic knowledge of the dynamic of behavior of nursing needs of patients with commonly occurring functional & organic mental disorders.			
---	تمريض نفسي وصحة عقلية عملي (١) Psychiatric Nursing and Mental Health Clinical(1)	٣ ساعات معتمدة (٠) نظري + (٣) عملي معتمد	PSY722
The course is intended to provide the nursing student with the knowledge will develop & acquire the skills, attitudes, abilities necessary to provide nursing care to patients with psychiatric disorders & to apply nursing process in care of those patients.			
---	نظريات علم النفس Psychological theories	٣ ساعات معتمدة (3) نظري + (٠) عملي معتمد	PSY723
The course is designed to study the relation between both basic neurological structures and functions and human behavior in health and illness. Pathological changes in neuro-physiology, neuro-chemistry and neuro-endocrinology, which directly influence on organism's human experience, motivation, language thought & learning and their role in the causation of mental			

disorders are emphasized.			
---	طب نفسي Psychiatric Medicine	٢ ساعات معتمدة (٢) نظري + (٢) عملي معتمد	PSY724
The course presents different categories of mental disorders, their epidemiology, etiological factors and clinical picture. Different treatment modalities (biological, psychological and environmental) and looking at the different possible kinds of fragmentation of mind are important part of this course.			
----	الإتجاهات الحديثة فى التمريض النفسى New Trends in Psychiatric Nursing	٢ ساعات (٢) نظري + (٠) عملي	PSY725
This course addresses .the main trends that influence nursing education, research, and practice. It follows the trend over time to show how and why it is ever changing, and how it shapes the nursing profession. It further introduces the novel and resurging issues that are currently under debate because of their influence on nursing.			
----	العلاجات البديلة فى التمريض النفسى والصحة العقلية Alternative therapies in psychiatric nursing and mental health	٢ ساعات (٢) نظري + (٠) عملي	PSY726
This course will look at the theories, clinical research, politics & controversies surrounding the use of various alternative health modalities. It will provide student with information to evaluate the use of complementary therapies for healing & health maintenance.			
----	آداب وقوانين المهنة Ethics and the laws of the profession	٢ ساعات معتمدة (٢) نظري + (٠) عملي معتمد	GEN921
This course focuses on health care policy, ethical considerations and legal decisions that impact the delivery of health care services in various health care settings to prevent health crises, nursing malpractice, and liability.			
PSY721 PSY722	تمريض نفسي وصحة عقلية (٢) Psychiatric Nursing and mental health (2)	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	PSY731
The course is intended to provide the nursing student with a basic knowledge of the dynamic of behavior of nursing needs of patients with commonly occurring functional & organic mental disorders.			
PSY721 PSY722	تمريض نفسي وصحة عقلية (٢) عملي Psychiatric Nursing and mental health Clinical(2)	٣ ساعات معتمدة (٠) نظري + (٣) عملي معتمد	PSY732
The clinical training includes both inpatient and outpatient psychiatric services. The student will develop & acquire the skills, attitudes, abilities necessary to provide nursing care to patients with psychiatric disorders & to apply nursing process in care of those patients.			

---	علم نفس فسيولوجي Psycho-Physiology	٢ ساعات معتمدة (٢) نظري + (٠) عملي معتمد	PSY733
The course is designed to equip students with the different theoretical frameworks that help them understand the human behavior, personality development, factors contributing to mental health as well as mental illness. Concepts of mental illness and treatment modalities based on the theoretical frameworks are also discussed. Emphasis also will be placed on the application of psychology to diverse human.			
---	علم الدواء النفسي Psycho-Pharmacology	٢ ساعات معتمدة (٢) نظري + (٠) عملي معتمد	PSY734
This course examines the history, rationale, pharmacology and putative mechanism of action of drugs used in the treatment of disorders and diseases of the central nervous system (CNS). Emphasis is placed on neurobiological processes underlying psychopathology and pharmacological intervention. Drugs currently in use as well as new drugs in development will be covered. Specific drug classes to be considered include antidepressants, anxiolytics, antipsychotics, narcotic analgesics, sedative hypnotics, and antiepileptic medications.			
---	المعالجة التمريضية للأمراض النفسية Nursing intervention of psychiatric disorders	٢ ساعات معتمدة (٢) نظري + (٠) عملي معتمد	PSY735
This course is designed to provide an overview of nursing interventions is used when caring for clients with acute and chronic alterations in mental health in a variety of settings. Topics include therapeutic communication skills, normal and abnormal behaviors, treatment modalities, and developmental needs. Upon completion of this course, students will demonstrate the ability to assist clients in maintaining psychosocial integrity through the use of the nursing process.			
---	العنف والصحة Violence and Health	١ ساعة معتمدة (١) نظري + (٠) عملي معتمد	PSY736
This course will provide students with knowledge in social, emotional, mental health, growth development, nutrition, conflict resolution, and tobacco, alcohol, drugs, violence resistance education. The physical, mental, social dimensions of health needed for a balanced life style will be discussed.			
---	المنظور النفس اجتماعي للإدمان Psycho social perspective of addiction	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	PSY737
This course has been developed to examine the physical, psychological, and sociological aspects of alcohol and drug use, abuse, and dependence. The course will provide an opportunity for students to examine their belief system about drug and alcohol use and will review the processes of addiction/dependence including the signs, symptoms, and behavior patterns.			
	الإرشاد النفسي (psychiatric counseling)	٢ ساعات (٢) نظري + (٠) عملي معتمد	PSY738
This course is intended as a bridge to graduate study and work in counseling psychiatric and related fields that involve dealing with others in distress or transition. Techniques of these approaches, implications for research, and modes of practice in counseling will be discussed and practiced. The course is intended to provide students with an overview of the therapeutic			

process, an introduction to rudimentary counseling skills, and issues related to the practice of psychotherapy (e.g., ethics, assessment, and licensure). Note, however, that this course is not designed to teach students how to conduct psychotherapy.

تخصص الماجستير في تمريض صحة المجتمع والأسرة

المقررات اللازمة	عدد ساعات التدريس المعتمدة	إسم المقرر	كود المقرر
----	تمريض صحة المجتمع (١) Community health nursing	٣ ساعة معتمدة (٣) نظري + (٠) عملي معتمد	COM721
This course is designed to help the students to gain good broad perspective of community health nursing. The complete health appraisal learned previously is used to guide the concepts of the individuals within the family and the family within the community either in illness or wellness. All concepts of the nursing process within the family and self care framework are applied. Analysis of roles and interactions of the community health nurse with individual, family and community is to be worked upon. Related topics to the primary health care aspects and community health will be applied during the course.			
---	تمريض صحة المجتمع (١) Community health nursing Clinical (1)	٢ ساعة معتمدة (٠) نظري + (٢) عملي معتمد	COM722
This course focuses on populations' health and the application of the principles of primary health care, the strategies of health promotion, and epidemiological concepts when caring with individuals, families, groups, aggregates, and communities. Professional, legal/ethical, economic, cultural, and environmental issues will be examined as they applied to community health nursing. The experiences embedded in the course provide opportunities for learners to translate theory into practice by conducting home visits, school health, environmental & community assessment and applying health education principles at different community settings.			
---	علم دراسة السكان Demography	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COM723
This course introduces the basic techniques of demographic analysis. Students will become familiar with the sources of data available for demographic research. Population composition and change measures will be presented. Measures of mortality, fertility, marriage and migration levels and patterns will be defined. Life table, standardization and population projection techniques will also be explored.			
---	علم وبائيات Science and epidemiology	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COM724
The course introduces the study designs applied to human populations, including randomized trials and four types of observational studies (cohort, case-control, cross-sectional, ecological). Because cause-and-effect relations are at the heart of epidemiologic research, numerous related topics are taught, including causal inference, and bias. There is a quantitative pre-test required for this course.			
---	تمريض صحة الأسرة Family Health nursing	٣ ساعة معتمدة (٢) نظري + (١) عملي معتمد	COM725

The family health nursing course enables the student to focus upon the holistic approach towards the family. Where they will discuss the culture, needs, problems that the families encounter and how to approach or intervene when necessary.			
---	أدارة البرامج الصحية في المجتمع Management of health programs in the community	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COM726
This course enables students to learn how to plan, implement and evaluate a health program, starting with the health related needs assessment in the community to determine priority areas for health education. Students will be introduced to the fundamentals of health program evaluation and be exposed to various evaluation approaches. Emphasis will be based on the importance of involving participants in the different phases of program planning implementation and evaluation.			
---	الرعاية التلطيفية Palliative Care	٢ ساعة معتمدة (٢) نظري + (٠) عملي معتمد	COM727
This course provides an intensive focus on improving the quality of life, care and dying of individuals and families experiencing life-threatening illness through nursing assessment and interventions to relieve pain and suffering.			
COM721	تمريض صحة المجتمع (٢) Community health nursing(2)	٣ ساعة معتمدة (٣) نظري + (٠) عملي معتمد	COM731
Presents the student with theories applicable to providing nursing care to the client/family in the home setting. Emphasis is on family theory and culture. Other broad topics include the home health system, chronic illness, disabilities, compliance, hospice, and chronic pain.			
COM721 COM722	تمريض صحة المجتمع والأسرة (٢) Community health nursing and family Clinical (2)	٢ ساعة معتمدة (٠) نظري + (٢) عملي معتمد	COM732
A variety of home health agencies are used where the student will have the opportunity to practice the principles of home health nursing. The Roy Adaptation Model is utilized to promote optimum health for individuals, families, and groups.			
---	تمريض المسنين Geriatric nursing	٣ ساعة معتمدة (٢) نظري + (١) عملي معتمد	COM733

Emphasis will be placed on the principles of learning and their use in the development of learner-oriented interactional methodologies

---	حلقة دراسية في التمريض النفسي والصحة العقلية Seminar in the psychiatric and mental health nursing	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	PSY823
-----	---	--	--------

This is a very specialized course in which psychiatric mental health nursing topics are manipulated and extensively discussed from all perspectives. Candidates are expected to read present and criticize research topics, review articles and state-of-the art relevant to the area, of specialty.

---	دراسة مستقلة في التمريض النفسي والصحة العقلية Independent study in the psychiatric and mental health nursing	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	PSY824
-----	--	--	--------

This is a tailored course that will be chosen and designed by both the candidate and the supervisor to support and complement the candidates' minor specialization. This can take the form of a theoretical course, a clinical experience, a field work, a library work, case studies or the like.

٥. تخصص تمريض صحة الأسرة والمجتمع

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
GEN934	البحث العلمي في التمريض (٢) Nursing Research(2)	٣ ساعات معتمدة (٢) نظري + (١) عملي معتمد	GEN936

The course introduces both the theoretical and empirical basis of qualitative research. Types of qualitative research are addressed, with special emphasize on data collection and management. The distinct differences between quantitative and qualitative research is elaborated. The candidates are provided the opportunity to run a miniature qualitative study under the supervision of the course professor.

----	الاتجاهات الحديثة في تمريض صحة الأسرة والمجتمع Recent trends in family health nursing and community	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	COM821
------	---	--	--------

This course enables the students to explore the new trends in the community health nursing

nationality and internationally. The students will be able to analyze the effect of these new trends on the community			
----	تطوير المناهج فى التمريض Curriculum development in nursing	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	GEN 937
This course is geared to provide the postgraduate student with basic knowledge about curriculum and skills to design, evaluate curriculum and apply appropriate strategies for changing curriculum			
----	حلقة دراسية فى تمريض صحة الأسرة والمجتمع Seminar in Nursing Family and Community Health	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	COM822
This course enables the candidate to attain a firm ground in the comprehensive discipline of community and family health nursing and an understanding of the developed specialty areas applicable to diverse professional opportunities. It also helps to promote the candidates' critical thinking and skills in the area of specialty.			
---	دراسة مستقلة فى تمريض صحة الأسرة والمجتمع An independent study in Nursing Family and Community Health	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	COM823
This course introduces students to the different socio-cultural factors affecting the health in the community. Particular emphasis is placed on the most common health problems in the community.			

٦- تخصص إدارة التمريض

المقررات اللازمة	إسم المقرر	عدد ساعات التدريس المعتمدة	كود المقرر
GEN934	البحث العلمى فى التمريض (٢) Nursing Research(2)	٣ ساعات معتمدة (٢) نظري + (١) عملي معتمد	GEN936
This course is geared to provide postgraduate students with basics knowledge and skills to be equipped with current and new trends and issues in research practices and publication in addition to how to make evidence at different levels.			
---	الاتجاهات الحديثة فى إدارة التمريض Recent trends in the management of nursing	٣ ساعات معتمدة (٣) نظري + (٠) عملي معتمد	NAD821
This course focuses on new trends and major issues in nursing leadership and management. Its relationship to the changes in organization, structure, and function of the healthcare and educational settings, Strategies that the nurse leader can use in contemporary nursing practice advancement.			

---	تطوير المناهج فى التمريض Curriculum development in nursing	٣ ساعات معتمدة (٣) نظرى + (٠) عملى معتمد	GEN 937
This course is geared to provide the postgraduate student with basic knowledge about curriculum and skills to design, evaluate curriculum and apply appropriate strategies for changing curriculum.			
---	حلقة دراسية فى إدارة التمريض Seminar in Nursing Administration	٣ ساعات معتمدة (٣) نظرى + (٠) عملى معتمد	NAD822
The course focuses on allowing an opportunity for doctoral nursing student to explore in depth different topics and strategies in nursing administration with an emphasis on leadership / accountability / commitment, Accreditation .An analysis of the existing health care systems.			
---	دراسة مستقلة فى إدارة التمريض An independent study in Nursing Administration	٣ ساعات معتمدة (٣) نظرى + (٠) عملى معتمد	NAD823
This course is geared to provide postgraduate students with the needed knowledge and skills to be equipped with the different research problems of current thesis among doctoral nursing students.
